View Credential
Came second in DSCE Hackathon where we built an e-commerce website, Unishop for College Students. Look at the project below.

2021 **Google Kickstart Round G**
View Credential
Secured a rank of 1812 in KickStart Round G.

2019 **Kickstart Hackathon**
This was my first hackathon experience where me and my team developed an Entertainment Wheel App using Android Studio that allows users to access various apps from a single app in their phone.

Experience

2021 **Python Developer for Rishab Pruthi**   **Nov,21-Jan,22**
View Work Sample
I worked as an Intern for Rishab Pruthi who is a derivatives trader. My responsiblitiy was backtesting of trading ideas, executing them, automation of the same using KiteConnect API in Python.

2021 **Point Blank**   **Technical Team Member**
• Volunteered to help and participate in various competitions and workshops and helped in building the community.

Projects

2021 **Personal Website**   **Vanilla JavaScript and Bootstrap**
Click Here
Visit my Personal Website to go through all of my projects.
I have highlight various projects under different domains in the portfolio section of my website.

2021 **Covid Tracker**   **ReactJS, Node, ES6**
Click Here
Real time Covid Tracker to track the number of cases and recovered cases of different countries. Used external API to import data.
View Source Code

2021 **UniShop**   **Php , Bootstrap, Mysql, Html / Css**
Click Here
Built this E-commerce Website for DSCE Hackathon where we came runner-up.This was a team project and I was responsible for the backend and database part.
